

CARTS 330: Advanced Ceramics

This course introduces students to advanced techniques in ceramics, including use of the potter's wheel and advanced hand-building techniques, glazing, decorating and treating surfaces of their ceramic work. The course will also present both historical and contemporary examples of ceramic work that illustrate ideas of design, functionality, and ceremony, so that students can gain deeper understanding and appreciation of the medium.

Units: 3

Prerequisites:

[CARTS 130](#) or Instructor Consent. Prior experience in ceramics is required.

Program: [Ceramics](#)
