

EDU 511: MA Thesis I

Students work on their MA Thesis under the supervision of a faculty advisor, building on the knowledge base acquired in EDU 502 and 508 to equip students with the research skills they will need to complete their MA Thesis. Work includes considering the relevancy of published research to their own work and discussing the strengths and weaknesses of various analytical methods. Students will have opportunities to share their research progress and receive feedback from their peers and faculty.
