

# ENVST 360/ECON 360: Environmental Economics

This upper division course combines theory and policy application in studying environmental issues from an economist's perspective. Major topics include theoretical and applied modeling of economy-environment relations, causes and consequences of market failure affecting environmental services, design and evaluation of environmental policy instruments, and the political economy of environmental policy. Students will learn to identify the economic components of an environmental issue, analyze the effects of human economic activity on the environment, and to present and discuss the pros and cons of various environmental policies.

**Units:** 3
